FFS Granule Packing Machine

## **HIGH-SPEED SERVO-ENABLED FFS GRANULE PACKING MACHINE**

**Weighing Range:** 50 g - 1 kg

**Accuracy:**  $\pm 2$  g

**Speed:** Up to 3600 pouches/hour (Max.)

### **Key Features:**

- Designed to handle any type of granular products with ease
- High-speed with unmatched accuracy
- Compact design and user-friendly HMI for easy operations
- Servo motor enabled duplex head
- Analytical reports for the decision making
- Self-adjust function with target value set for easy operations

## Applications

Rice

Wheat

Pulses

Spices

Sugar

Tea

Coffee

PVC Granules

## Specifications

|                     |                                                                 |
|---------------------|-----------------------------------------------------------------|
| Model               | AutoPackPro AF-01KII                                            |
| Weighing Range      | 0.05~1 kg                                                       |
| Division            | 1 g                                                             |
| Accuracy            | ±2 g                                                            |
| Highest Speed       | 3600 pcs/h                                                      |
| Volume              | 2.8L*2                                                          |
| Communication       | USB, 2*RS485                                                    |
| Air Supply          | 0.4~0.6MPa 2m <sup>3</sup> /h                                   |
| Environment         | 0°C~40°C, 90% R.H., No condensation                             |
| Power               | AC230V±10%, 50/60Hz, 400W                                       |
| Feeding/Discharging | Servo motor + vibrator feeding-type, pneumatic discharging-type |
| Material            | Carbon steel/Stainless steel optional                           |

\*Normally, the diameter of the testing material is 1-5 mm.
